

## Vocera Clinical and Operational Assessment

A clinical communication and collaboration platform can help connect the people and information needed to deliver care. However, determining the right technology that aligns with your organization's strategic goals can be challenging.

Vocera offers a clinical and operational assessment to help you understand how our technology can help eliminate redundancies, communicate more efficiently, and improve outcomes.

“Our Vocera clinical executive was an expert in clinical and workflow analysis. She made it easy to see how Vocera could enhance workflows, create call escalation pathways, and improve end-user's experience.”

**James Caldwell, MD**  
Vice President Medical Surgical Operations and Chief Clinical Officer at Parkview Medical Center

### Recommendations as Unique as Your Organization

Receive personalized recommendations from a Vocera clinical executive for how to improve workflows, optimize user experience, measure key performance indicators, and more. We can also help demonstrate the financial impact that leveraging Vocera technology can have on your organization.

### Highly-Skilled Expertise

Vocera clinical executives, who are nurses with expansive experience working in clinical environments, conduct all assessments.

### Proven Approach

During the assessment process, a clinical leader from your organization will partner with a Vocera clinical executive to establish specific goals, a desired timeline, and steps for completing the in-depth assessment. They will present your personalized assessment to key leaders within your organization.
